## DATA ENGINEER

- 12/04/1995
- Go Vap District, HCMC
- +84 0354883673
- dangnhatsimon@gmail.com

## Profile

- LinkedIn
- Github

## Skills

### Basic:

- Data Structures ● ● ● ● ●
- Algorithms ● ● ● ● ●
- Prob & Stats ● ● ● ● ●

### Programming:

- Python, R, LaTeX ● ● ● ● ●
- JavaScript, Scala ● ● ● ● ●

### Database:

- MySQL, SQL Server ● ● ● ● ●
- MongoDB ● ● ● ● ●

### Big Data:

- Hadoop, Spark ● ● ● ● ●

### Machine Learning:

- numpy, pandas, polars ● ● ● ● ●
- polars, tensorflow ● ● ● ● ●
- scikit-learn ● ● ● ● ●

### Data Visualization:

- Tableau, Power BI ● ● ● ● ●

### Detail-oriented

### Structured thinking

### Analytical thinking

### Hard working

### Teamwork

### Data Storytelling

## Working Experience

Oct 2022 – Present

### Data Engineer

PECC2

Contribute to Big Data Development Plan for Company. Hadoop, Spark for Data Analytics. Running automation with Python, Bash scripting on Ubuntu. Version control system like Git. Monitoring health of server computers.

Core technologies: Big Data Analytics, Python, Bash, Git, Ubuntu. Getting data like power output, weather, current and voltage from site, through pipelines to database server at company, after processing and manipulating, data will be analyzed, visualized in apps. All reports and dynamic dashboard will be sent streaming to the end users to help them improve experiences, making decisions. Core technologies: ETL, Data Engineering, Python.

Oct 2019 – Oct 2022

### Mechanical Piping Engineer

PECC2

BIM Manager and Mechanical Lead. Using 3D laser scan data and BIM software to create and manage information.

Designing general plant layout for LNG Power Plant.

Thermal-Mechanical and piping engineering for specific systems in Power Plants, engineering, reports, calculation spreadsheets, mechanical drawings.

Field engineer of Solar Farm Power.

Core technologies: Piping and Instrumentation Drawing (P&ID) · Control Valves · Pump · Conveyor Belts · Piping Design · Smart Plant 3D · AutoCAD Plant 3D · Pipe Stress Analysis · AutoCAD · Navisworks.

## Project

Jul 2023 – Jul 2023

### PySpark

Data Engineer

Understand Resilient Distributed Datasets (RDDs) of Spark, using pyspark to store data in distributed file system, transformation and actions datasets.

Spark SQL for Big Data Analytics. Create, import, inspecting, cleaning, querying and saving data with pyspark.

Core technologies: Python, Spark.

Jul 2023 – Jul 2023

### freeCodeCamp

Data Engineer

Mean-Variance-Standard Deviation Calculator: using Numpy to output the mean, variance, standard deviation, max, min, and sum of the rows, columns, and elements in matrix.

Demographic Data Analyzer: using Pandas to analyze, manipulate data from the 1994 Census database.

Medical Data Visualizer: converting, cleaning data, explore the relationship between cardiac disease, body measurements, blood markers, and lifestyle choices.

Page View Time Series Visualizer: using Pandas, Matplotlib, and Seaborn to visualize a dataset containing the number of page views each day on the freeCodeCamp.org forum from 2016-05-09 to 2019-12-03, understand the patterns in visits and identify yearly and monthly growth.

Sea Level Predictor: analyze a dataset of the global average sea level change since 1880, use the data to predict the sea level change through year 2050.

Core technologies: Data Analysis with Python by using library Numpy, Pandas, Seaborn, Matplotlib to ingest, process, manipulate, analyze and visualize data.

# DANG NHAT

DATA ENGINEER

## About Me

I am a results-driven Data Engineer with a passion for creating efficient data pipelines and optimizing data workflows. My expertise lies in designing and implementing robust data warehouses, modeling data structures for optimal performance, and integrating diverse data sources. With hands-on experience in data transformation and real-time processing, I am adept at turning raw data into actionable insights.

## Languages

Vietnamese	● ● ● ● ●
English	● ● ● ● ●
Russian	● ● ● ● ●
Chinese	● ● ● ● ●

## Project

Oct 2022 – Oct 2022	<b>Cyclistic Bike Share</b> Using MySQL, R and Python to combine, cleaning, manipulate, analyze and visualize to get insights from 1 millions data casual and annual membership riders. Identify trend from Cyclistic's historical bike trip data and then planning digital media could affect marketing tactics. Core technologies: MySQL, Python, R, Tableau.	<b>Data Analyst</b>
Oct 2022 – Oct 2022	<b>FitBit Fitness Tracker</b> The user data from FitBit Fitness Tracker has been merged and categorised into different sections; daily activity, daily calories daily intensities, daily steps, etc. Using MySQL, R and Python to combine, cleaning, manipulate, analyze FitBit fitness tracker data to gain insights into how consumers are using the FitBit app and discover trends for Bellabeat marketing strategy. Core technologies: MySQL, Python, R, Tableau.	<b>Data Analyst</b>

## Education

### Undergraduate Study

2014 – 2019	<b>B.Sc. in Nuclear Power Engineering and Thermal Physics</b> <b>Title:</b> Analysis of the transient mode in the VVER-1000 core when two main circulation pumps are switched off at rated power. <b>Supervisors:</b> Prof. Leskin Sergei Terent'evich. <b>Knowlegde:</b> Nuclear Power system and Nuclear Reactor, especially WWER-1000 · Steam Generator (Boiler) and Heat Exchangers · Steam Turbine · Industrial Pump · Nuclear reactor safety systems · Valves <b>GPA:</b> 4.6/5.0	Russia
-------------	---	--------

## Certificate

Aug 2023	Data Analysis with Python	freeCodeCamp
Aug 2023	Python Intermediate	Sololearn
Aug 2023	SQL Intermediate	Sololearn
Jul 2023	Python (Basic) Certificate	HackerRank
Jul 2023	SQL (Intermediate) Certificate	HackerRank
Jan 2023	Google Data Analytics	Coursera
Jun 2023	Google IT Automation with Python	Coursera
Jan 2022	Lean Six Sigma Green Belt (ICGB)	Business Research and Training, VN
Sep 2018	Olympic Internet Open	Russia
Sep 2016	Russian young leader for Excellent student	Russia
Sep 2013	Excellent in academic activities	HCM University of Sciences, VN
